

OVERVIEW

Full stack, clean-code, polyglot technologist with deep open-source agile exposure. Experienced in delivering solutions to complex systems within private & public sector across Europe & beyond. Globally minded leader who brings to the table a combination of strategic, analytical, creative & person skills. Track record of mentoring & nurturing talent. Values driven and authentic. At ease creating spaces for smart teams to flourish. Comfortable at the bleeding edge of R&D. Member of the IEEE & Central Bank Research Association. Safe pair of hands and asset to most projects.

SKILLS

Code	C# (advanced); Python (advanced); Rust (advanced); [JavalType]script (advanced); Bash (advanced);
Agentic	Claude Code Max user. Studying for Claude Certified Architect Foundation qualification.
Process	Agentic, Agile; Scrum; XP; Kanban; TDD; CI/CD; GitHub;
UI	React; Vue; Svelte; Backbone; MS-WPF; MS-WF;
dB	PostgresQL; MongoDB; Elastic Search; Solr; Oracle; SQL Server; AS-400. RabbitMQ;
DevOps	Docker; Kubernetes; Terraform; Ainsible; AWS Cloud.
OS	Linux; Mac OSX; Windows.
Other	Blockchain; Event Driven Architecture; Message Brokers; Micro-Services. Agentism.

EXPERIENCE

2021 - 2026 Head of Software, QZabre @ ETH, Zurich, Switzerland

Driving process change within an ETH spin-off building bleeding-edge nanoscale microscopes using quantum magnometry technology. Oversaw transition to a lightweight but structured agile process. Designed & developed multiple photonic & magnetic device controllers. Redesigned existing desktop UI application. Mentored c-suite and software team. Drove rollout of rust programming language within context of the in-house QS3 software platform.

2025 - 2026 Head of Technical Strategy, Inversed Tech, Madrid, Spain

Member of an R&D team specialising in cryptography and distributed systems. Worked across the organisation in a hybrid capacity performing a diverse set of roles. As rust engineer developed a genesis protocol and tooling for a secure multi-party computation based biometric identity platform. As technical product owner drove customer facing projects, e.g. a regulated privacy focussed stablecoin; a privacy based customer loyalty program. As business development technical lead I represented the company at events, articulated strategy, identified industry trends, and led outreach.

2022 - 2024 Head of R&D, Casper Association, Zug, Switzerland

Led an R&D team in a highly complex blockchain environment. Highly visible role with significant additional internal & external responsibilities. Worked alongside Head of Engineering to merge R&D proof of concepts into core product. In collaboration with a team of respected macro-economists designed a blockchain enabled core banking platform predicated upon an emerging financial standard. Significant rust programming combined with cutting edge cryptography (e.g. Zero Knowledge). Designed and developed rust solutions such as a ZK rollup and a ZK light client.

2019 - 2021 Software Architect, Casper Labs AG, Zug, Switzerland

Member of a global team that delivered a layer 1 blockchain platform underpinned by a DAG based proof-of-stake consensus mechanism. Primary role was within context of system testing, i.e. design & implementation of an event driven, scalable fuzzy test platform capable of identifying consensus flaws. Secondary role was streamlining platform integrations by external partners. Drove pro-services team, mentored c-suite executives. High degree of visibility.

2018 - 2019 Software Engineer, Trinkler Software, Zug, Switzerland

Contributed to development of a decentralised finance eco-system for a Zug based start-up. Mentored junior colleagues & provided oversight to eco-system design. Directly responsible for the development of: a GraphQL trading API; a feature rich command line interface application; a multi-chain digital wallet; and a Vue.js front-end application.

Mark A. Conway-Greenslade

Obermühleweid 4, CH-6330, Zug, Switzerland

+41 (0)76 840 0042 quantumcortex@gmail.com

2009 - 2022 Software Architect, Institut Pierre Simon Laplace @ La Sorbonne, Paris, France

Privileged to work at the cutting edge of climatology research. Augmented the IPSL's climatology HPC simulation environment with an innovative realtime, event-driven, messaging platform in support of use cases such as automated documentation, real-time monitoring, performance analytics & machine intelligence. Technical lead of es-doc.org, an international project focussing upon climate model documentation. Driver of software development process change.

2008 - 2013 Software Architect, NTT Data, Fribourg, Switzerland

Drove technology & process change within Swiss arm of a global IT services company. Introduced Agile techniques: Sprint; Scrum; XP; CI/CD. Designed & developed a .NET SOA framework. Mentored a 7 person development team.

2007 - 2008 Software Architect, British Telecom, Dublin, Ireland

Designed & led development of an interoperable B2B order processing web service. Extensive use of .NET 3.0, domain driven design & SOA. Designed a sophisticated rules based workflow engine.

2006 - 2007 Software Engineer, DeCare Systems, Cork, Ireland

Designed & led development of a high volume, real-time enrolment service for a US based insurance provider. N-tier architecture with WCF based inter-tier communication services.

2006 Software Engineer, SnapOn Diagnostics, Cork, Ireland

Agile driven migration of C++ systems to .NET 2.0. Developed web-services to share real-time automobile diagnostics information across a suite of listening applications. Scrum, XP, TDD.

2005 Software Engineer, Classic Car collection, Paris, France

Full stack .NET engineer in support of a sales & management information system. Primary responsibilities: architecture & design; web-application development; testing & deployments.

2000 - 2001 Software Architect, Securicor Systems, Bath, UK

Architect of a successful central London traffic violation adjudication system. Layered design pattern separated core GUI, middleware, data access & security subsystems. Led a 12 man team.

1999 - 2000 Software Engineer, SSRADU, Bath, UK

N-tier client-server systems design & development. Developed a COM based framework in VB.

1998 Software Engineer, 3S Electronic Publishing, Bath, UK

MS Access, VB4/5/6 development. GUI & database design. Test plan authoring.

1992 - 1993 Software Engineer, Customer Interface, Bristol, UK

RPG-400 developer. Technical Author. Database designer. Parallel live tester.

1989 - 1990 Software Engineer, Cap Gemini, Bristol, UK

Member of a team that successfully delivered Europe's largest IBM AS-400 project.

EDUCATION

2008 Microsoft Certified Software Architect, Microsoft Campus, San Francisco, USA

1989 B.Sc. Economics & Operational Research, University of Leeds, UK

OTHER

Civil Status UK citizen with Swiss Permit. Born 27-02-1967. Married with 2 children.

Languages English (fluent), French (fluent), Italian (advanced), German (average).

Travel Japan, China, Europe, India, Middle-East, North & Central America.

Interests Tennis, Cricket, Swimming, Cycling, Singing, History, Art.
